

Complex Building Solutions made Simple

Alpha-Air has developed a comprehensive building management system, capable of controlling and monitoring all aspects of your building, using latest technologies, constructed with high quality components.

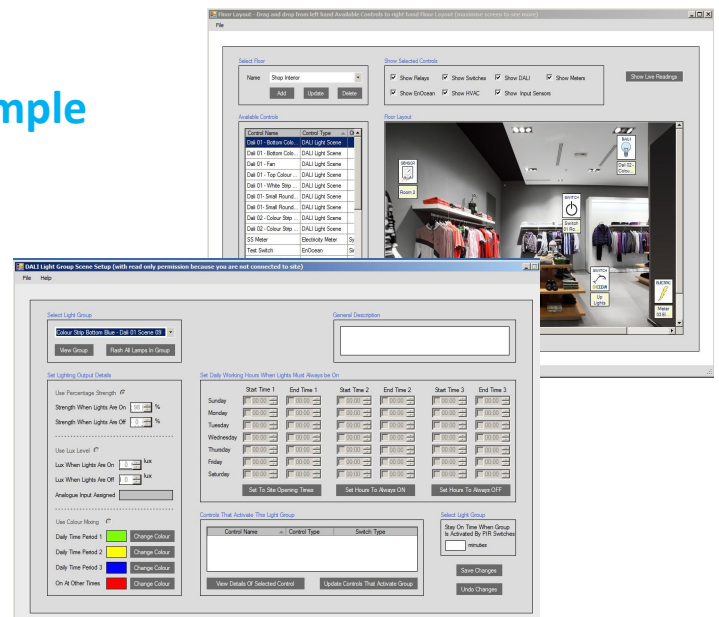

This system is highly efficient, compact and able to interface with many other protocols - KNX, Modbus, M-Bus, Dali & BACnet.

Operation of the Alpha-air system is simple, straightforward and direct: allowing you the freedom to manage all building services remotely, from any location - whilst offering you the ultimate in flexibility : to add a virtually infinite number of additional devices or further locations onto the system.

Features

- * Front End Simple Interface
- * Customised Reporting
- * Identifying Equipment failures
- * Standard panels with software
- * Easy to install and use
- * Energy savings between 10 - 32 % if not more
- * Advanced Technology
- * Leak Detection
- * Proven Top Quality Components

Control Capabilities

- * Lighting Control
- * HVAC
- * Shutter/Blind & Shading Control
- * Alarm Monitoring
- * Energy Monitoring
- * Electricity Gas Water
- * EnOcean
- * BACnet/Trend Interface
- * iPad/iPhone Touch Panel Interfaces
- * Stylish Switches & Monitors

Energy Savings

With spiralling energy costs, having an effective BMS system is crucial for controlling your budgets and lowering your carbon footprint.

At Alpha Air we understand that no two buildings are identical and would require very different solutions.

As a company we are used to working closely with Consultants, Designers & Facilities Managers to achieve maximum savings and efficiency.
